

ELITECONTROLS
Innovation Powering Automation

SOFTWARE DEVELOPMENT

Our software development starts with a discussion to understand each client's equipment and desired functionality. Either for a one time unique machine or a high volume production system, Elite Controls will custom tailor the software to meet your exact needs.

- Eaton Pro-FX™ mobile equipment control solutions
- Danfoss PLUS+1™ GUIDE programming
- Murphy
 - engine control systems
 - marine displays
- IDEC PLC industrial controls
- Remote asset management
- Mobile interface and touchscreen options

ELECTRIC DRIVE SOLUTIONS

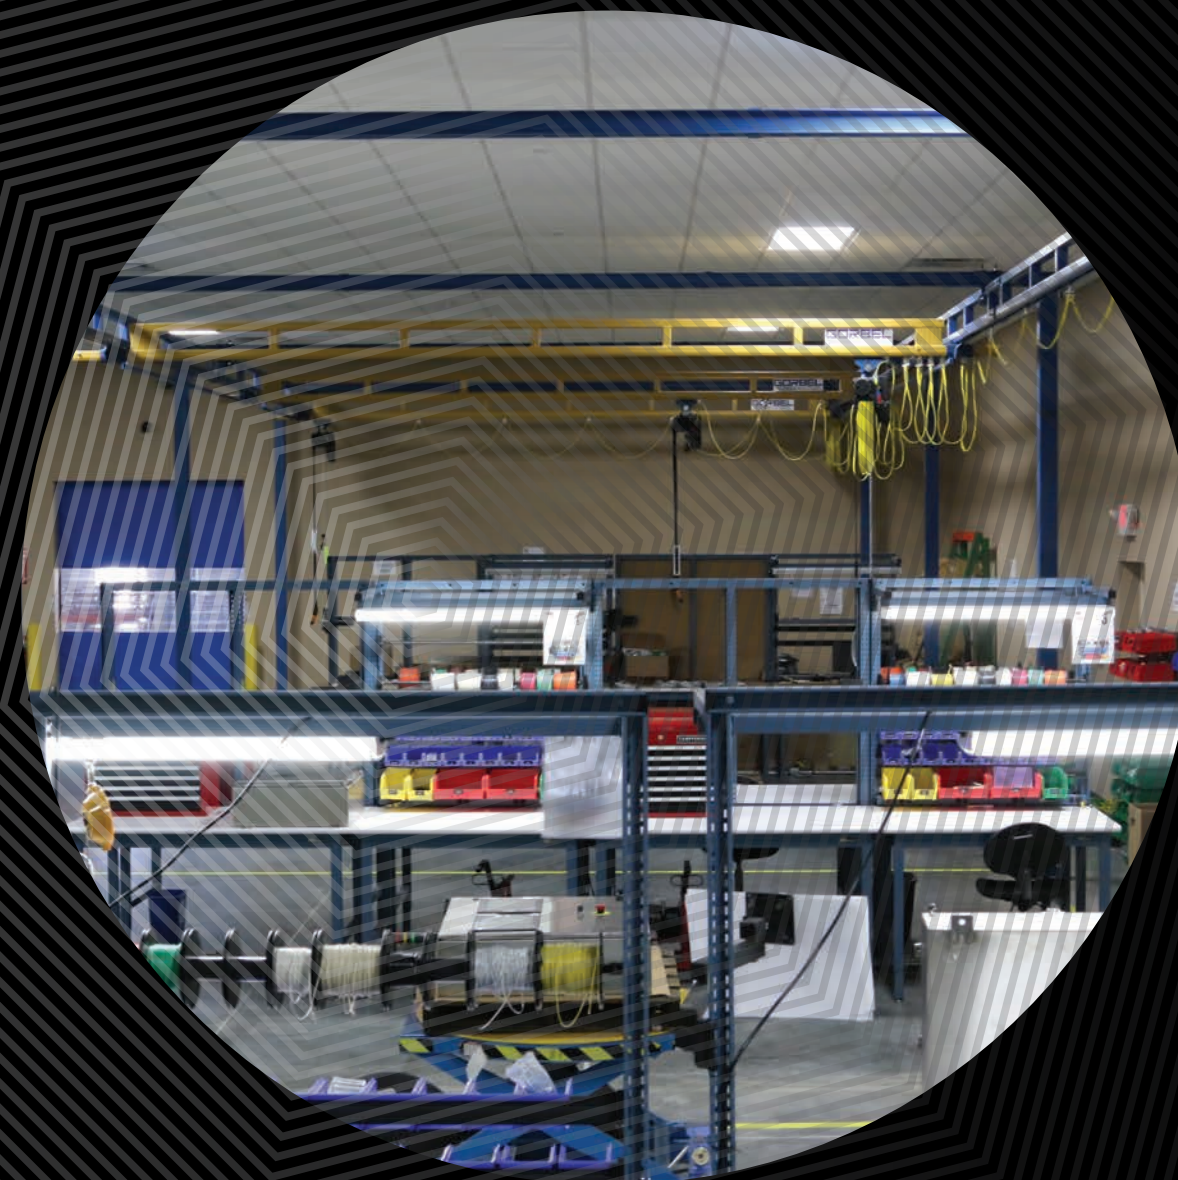

With the increasing use of electric drives, Elite Controls provides innovative options with VFD technology and the latest sensor options. Whether you're looking for simple and cost-effective or complex and cutting edge, we can provide a custom solution.

PANEL DESIGN & ASSEMBLY

We design custom control panels for industrial and mobile applications. With our 16,000 ft² facility, we quickly respond to client needs

with control panels that are designed for easy installation and fully tested before shipment.

- Panels built to NFPA 79 and UL specifications
- Custom Wiring Harnesses
- HMI with touchscreen interface available
- Complete life-cycle support including design, fabrication, start-up and software maintenance and upgrades
- Retrofit options for existing control systems
- ATEX/IEC Ex and UL certified hazardous location control panels

EXTENSION OF YOUR ENGINEERING GROUP

We partner with OEM engineering departments because of our extensive expertise in electric and electro-hydraulic control systems. We understand each OEM has many other components of equipment design to manage, and we can provide a turn-key solution to alleviate internal investment of time and resources.

"Over the past five years I've been working with Scott and his team, they have proven an invaluable resource to determine the best controls for our new models of ag equipment. I trust them to listen to my needs, provide the best solution and deliver on the components to meet our build schedule."

SCOTT BREIGHNER, GVM INC.

Committed to OEMs

- Custom design based on your system requirements
- Team with over 40 years combined experience
- Complete package of software, panels and touchscreen controls
- Multiple manufacturer options to select best solution for your applications.

OUR MISSION

To provide robust, user-friendly control systems designed to enhance the performance of equipment, improve efficiency of operations and reduce total cost of ownership.

Innovation: we take the challenge to combine expertise with creativity to develop the best solution for each application.

Reliability: we believe in "doing what we say we're going to do" and ensuring all of our systems maintain quality standards to maximize uptime.

Partnership: we are committed to building relationships with both clients and manufacturers in order to continue profitable growth of the company.

Our expertise allows us to work in a large variety of industries:

Oil & Gas
Mobile Equipment
Marine
Industrial
Agriculture
